

End Cards

End cards are used to end or conclude the chat.

All end cards are supported in Facebook, Instagram, WhatsApp and Telegram.

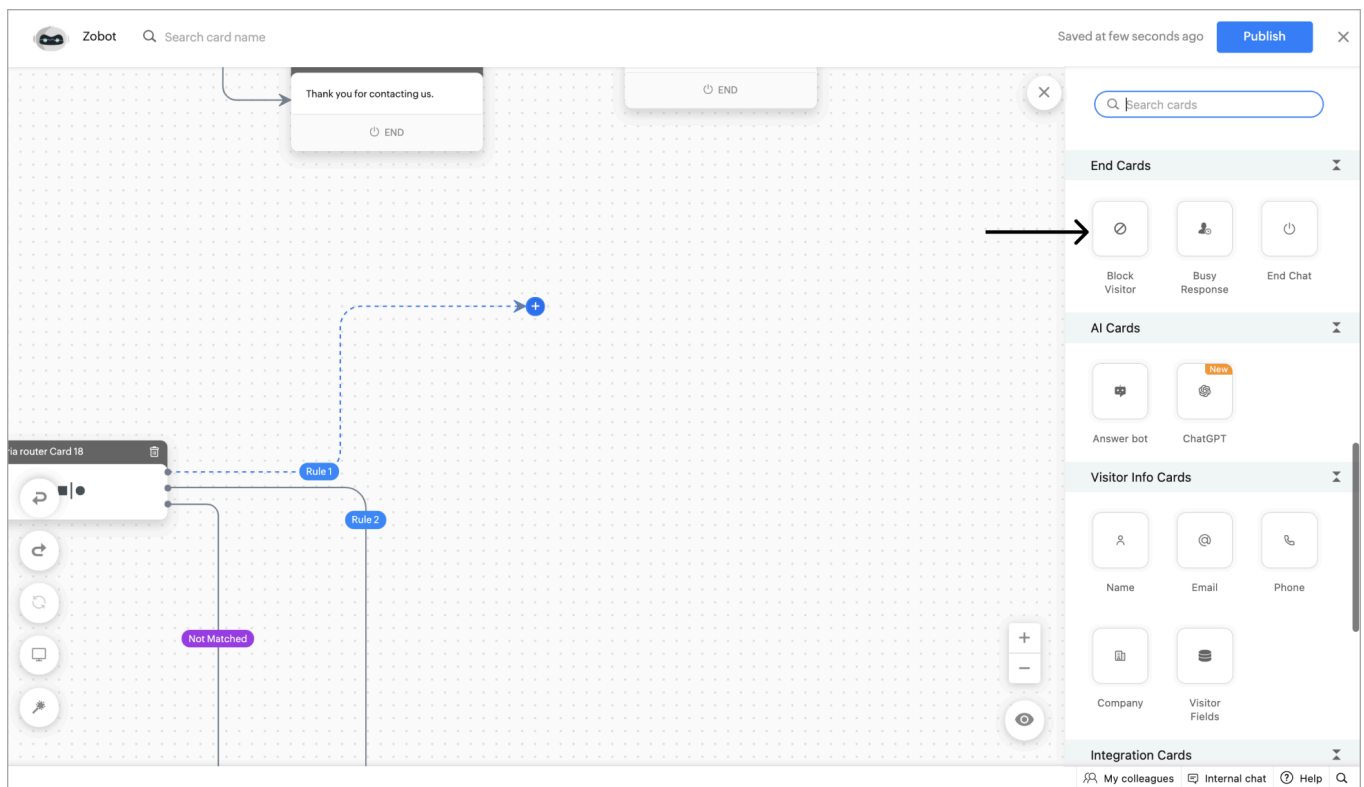

Block Visitor

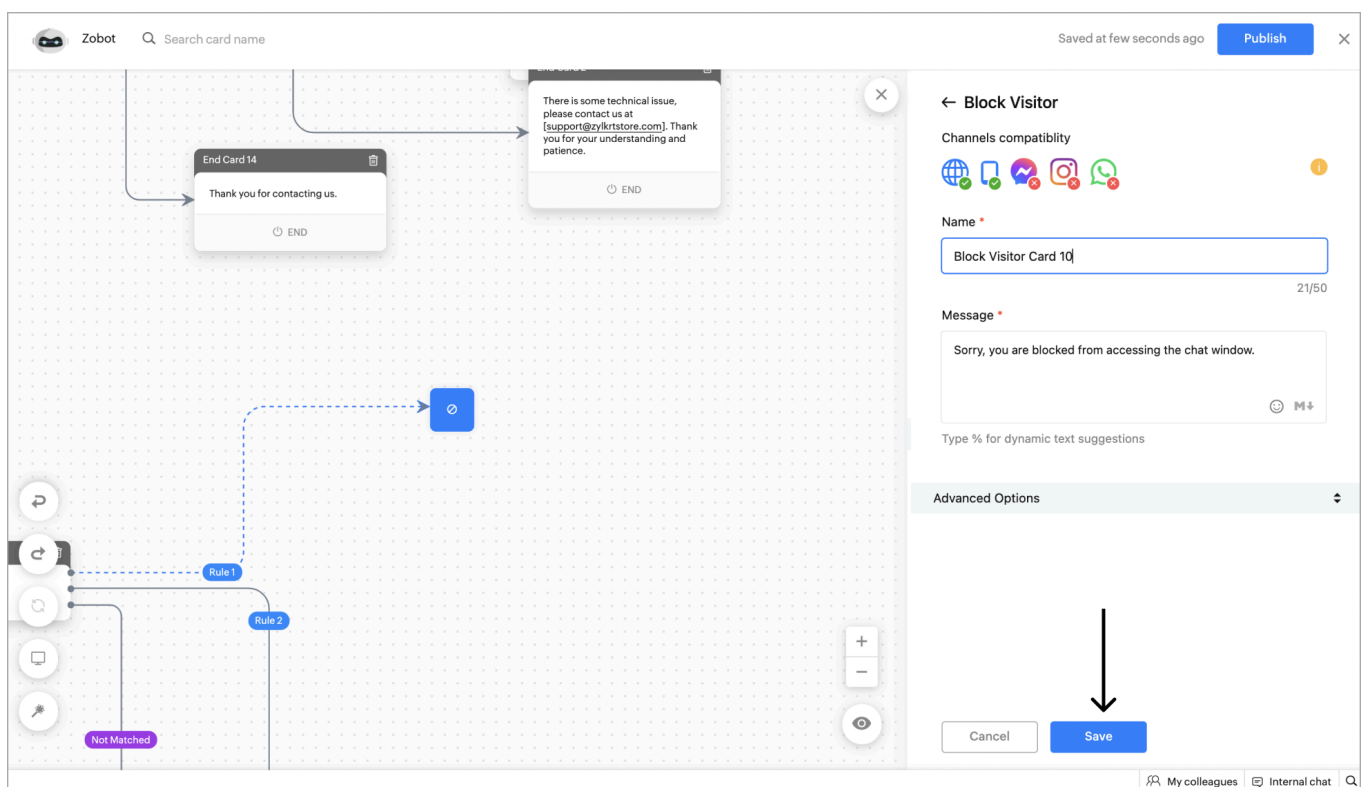

The block visitor card allows you to block the visitor.

- To add this card to your bot's flow, click on the card holder (+) icon to view the card gallery and select **Block Visitor** card under the end card section.

- Add **name** and image for the card. Add the block **notice message** in the message box. If activated, the visitor will receive the message, get blocked and the chat widget will disappear for them.
- Click **Save**.

Example - Specifying the spammer's IP address on the criteria router card, the block card is used to block the spammers if spammers initiate a conversation.

Use Case:

Output:

Busy Response

If the chat is routed to an operator or a department, and if all the operators are busy, then this allows the visitors to leave a message before the chat is ended. Once ended, the chat will be marked as **missed**.

- To add busy response card, click on the cardholder (+) icon to view the card gallery and select the **Busy response** card under the End cards section.

The screenshot displays the Zobot AI chatbot interface, showing a complex flowchart for handling customer inquiries. The flowchart starts with a 'Forward Card 11' card, which branches into 'Offline', 'Operators NA', and 'Invalid' paths. The 'Offline' path leads to a card asking if the user's mind can be set for a meeting, which then branches into 'Yes' and 'No' paths. The 'Yes' path leads to 'End Card 3' (Have a nice day), and the 'No' path leads to 'End Card 2' (Technical issue). The 'Operators NA' path leads to 'End Card 2', and the 'Invalid' path leads to a blue plus icon. The interface also includes a search bar, a 'Publish' button, and a sidebar with various card categories like End Cards, AI Cards, Visitor Info Cards, and Integration Cards.

- Add **name** and image for the card, and specify the **message** you want to show when all the operators or the routed operator is busy at the moment.

- Click **Save**.

The screenshot shows the Zobot chatbot builder interface. On the left, a flowchart is visible with cards like 'Forward Card 11', 'Operators NA', 'Invalid', 'End Card 2', and 'End Card 3'. On the right, the 'Busy Response' configuration panel is open. It includes a 'Channels compatibility' section with icons for various channels, a 'Name' field with the value 'Busy Response Card 10', and a 'Message' field with the text: 'All our agents are busy at the moment, leave us a message and we will get back to you'. At the bottom of the panel, there are 'Cancel' and 'Save' buttons. A black arrow points to the 'Save' button.

Example - Allowing the website visitors to leave a message when all operators are busy.

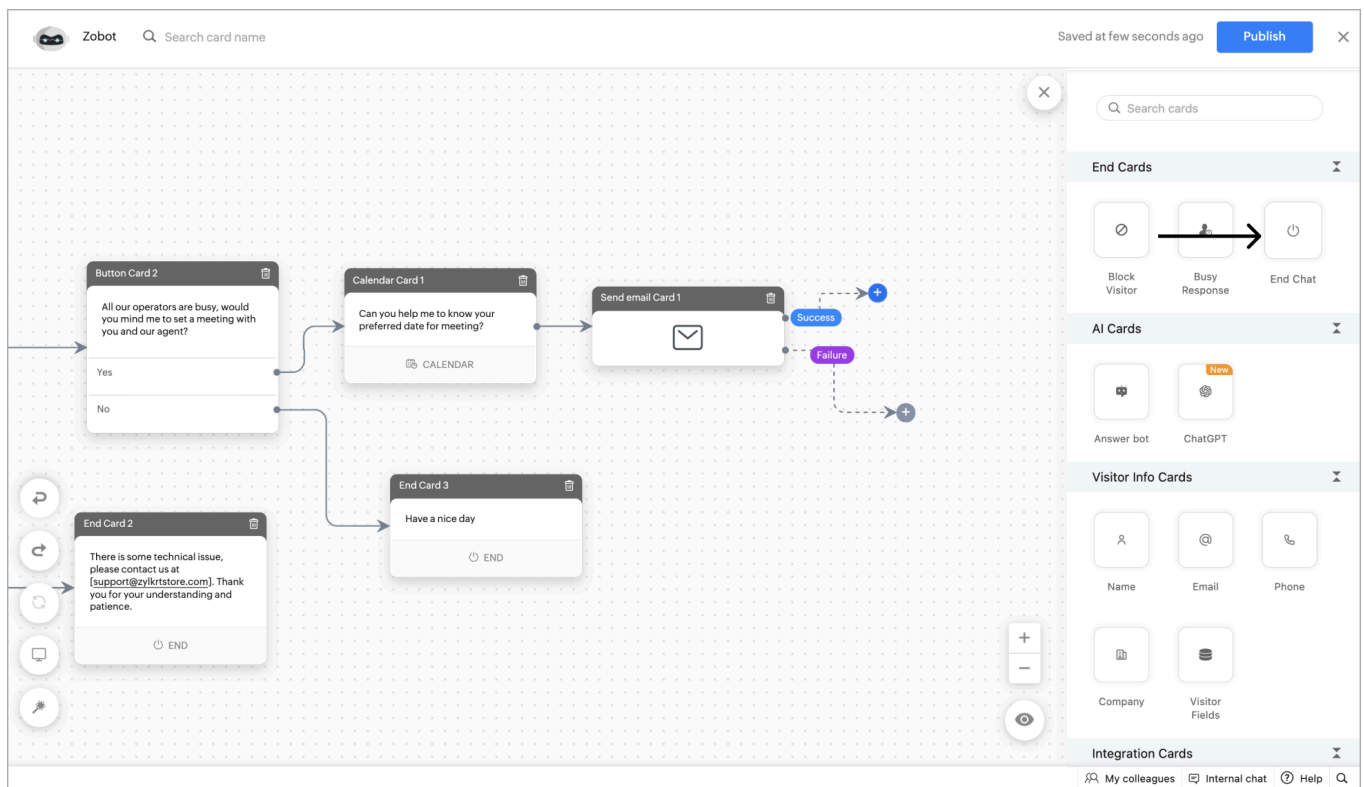

The screenshot shows the Zobot chatbot builder interface with a flowchart on the left and a chat output preview on the right. The flowchart includes cards like 'Flow 3 - Suggestion 2', 'Flow 3 - Forward Sales', 'Flow 3 - Operator busy', and 'Flow 3 - Invalid'. The chat output preview shows a conversation between 'Bob' and 'James'. Bob asks for a phone number, James provides '+1 2345 6789', Bob says 'Hey there! Not sure of what you are looking for? I can help!', and James says 'Chat with Sales'. Bob then says 'Our operators are busy at the moment, please leave us a message. We will contact you soon.' A black arrow points from the 'Save' button in the 'Busy Response' panel to the chat output preview.

End Chat

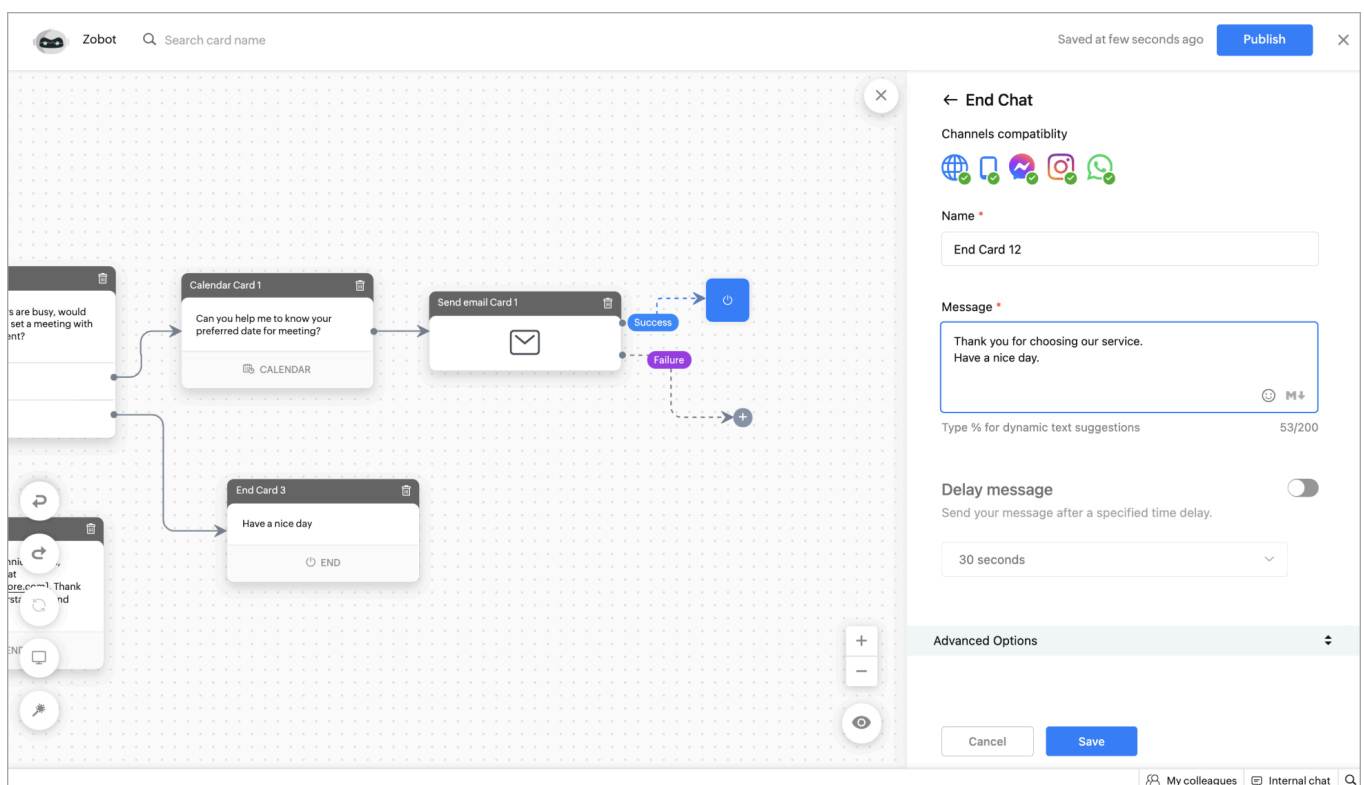

This card is used to end the conversation.

- Click on the card holder (+) icon to view the card gallery and select the **End Chat** card under the End card section.

- Add the message that you want to send before ending the conversation.

- Also, there is option to the delay end message.
- To do it, enable the delay message and specify the time.
- Then, the message provided in the message box will be sent to the visitor after the specified time.
- Click **Save**.

The screenshot displays the Zobot chatbot builder interface. On the left, a flowchart is visible on a grid background. It includes a 'Calendar Card 1' with the message 'Can you help me to know your preferred date for meeting?' and a 'Send email Card 1' with an envelope icon. A 'Success' path leads to a blue power button icon, and a 'Failure' path leads to a plus sign icon. Below the main flowchart, there is an 'End Card 3' with the message 'Have a nice day' and an 'END' button. On the right, a configuration panel for the 'End Chat' card is shown. It includes a 'Channels compatibility' section with icons for various messaging apps, a 'Name' field with the value 'End Chat Card 10', a 'Message' field with the value 'Have a nice day', a 'Delay chat closure' section with a toggle switch and a dropdown set to '30 seconds', and an 'Advanced Options' section with 'Cancel' and 'Save' buttons. The top of the interface shows the 'Zobot' logo and a search bar.

Example - Ending the chat of the visitor by greeting.

Use Case:

```
graph LR; A[Please share your location to avoid any delays] --> B[Thank you for choosing our service. Have a great day]; B --> C[Thank you for choosing our service. Have a great day]; C --> D[Thank you for choosing our service. Have a great day];
```

Output:

Bob: Please share your location to avoid any delays.

Bot: Thank you for choosing our service. Have a great day.

Bob: Thank you for choosing our service. Have a great day.

Bot: Thank you for choosing our service. Have a great day.
